Summary

iOS Engineer with 8 years of Swift, taking apps from wireframe to App Store release. Builds on The Composable Architecture and MVVM with Swift Concurrency, and connects native clients to Server-Side Swift and REST backends. Four years setting the shared Swift style and architecture standards for 400+ developers at the Apple Developer Academy through daily code review. Six years as an Apple Certified Trainer for enterprise engineering teams. Co-founded two startups, one acquired.

Experience

Co-Founder & Tech Lead — Unicorn Donkeys

Jun 2025 – Present · Naples

- Architected and built Defenso.it, a legal-workflow automation product, from prototype to shipped architecture as sole engineer on the native client.
- Own authentication, data handling and the API contract between the native clients and the Server-Side Swift backend.
- Launching Quobe (iOS, October 2026): TCA, CloudKit record sharing over a local SQLite store, VisionKit Live Text and a custom design system.

iOS Engineer & Faculty Member — Apple Developer Academy, Naples (Imaginary Institute s.r.l.)

Oct 2021 – Jun 2025

- Reviewed code and pair-programmed daily across a cohort of 400+ developers, defining and enforcing the Swift style and architecture standards the academy worked to.
- Designed and shipped native iOS apps and prototypes in Swift and SwiftUI, from wireframe through App Store submission.
- Led cross-functional teams of 4–6 in an Agile setup, running the full UX process with designers.
- Spoke at Academy conferences and led the organisation of the Academy Future Fair in 2024 and 2025.

Apple Certified Trainer — Apple / LearnQuest (freelance)

Sep 2019 – 2025 · Remote

- Delivered Apple-authorized training on Swift, SwiftUI and the iOS and macOS SDKs to engineering teams at dozens of enterprise clients (names under NDA).
- Turned each new SDK release into production-ready implementation patterns for teams adopting it.

Technical Writer & Speaker — Create with Swift (freelance)

Oct 2021 – Jun 2025 · Remote

- Wrote technical articles on Swift, SwiftUI, AVFoundation, Server-Side Swift and CI/CD, and ran talks and workshops.

Co-Founder & Lead Software Engineer — Tilted Penguins s.r.l.s.

2018 – 2019 · Naples

- Built morganize.it end-to-end, native iOS client plus cloud backend, owning the product from architecture to release. Its assets were acquired by a private investor.

iOS Developer Intern — Apple Developer Academy, Naples

Sep 2018 – Aug 2019

Full-Stack Developer Intern — Gulliver s.r.l.

Feb 2018 – Jul 2018 · Brescia

Apps

Quobe (iOS, launching Oct 2026) — Social reading app where a club shares a current read and the passages it pulls out. Multi-device iCloud sync and invite-based clubs on CloudKit sharing, quotes captured from paper with VisionKit Live Text, books added by EAN barcode scan. TCA with a custom serif design system in light and dark.

Privacy Form (iOS, iPadOS) — Event-consent platform used at events with 3,000–4,000 attendees. PencilKit signatures, email receipts, consent records handled under GDPR.

Outsoon (iOS) — Movie tracker on TCA and Swift Concurrency, with filter-driven search across a large catalogue and local persistence.

MindLand (iOS) — Renders a night of sleep as an interactive 3D island, mapping sleep stages against heart rate in SwiftUI.

Delegibus (macOS, iPadOS, iOS) — Brings Italian law into Spotlight search, using a Server-Side Swift backend that scrapes official sources.

QRSwift (macOS) — Menu-bar QR generator. Fully offline, no tracking, no network entitlement.

Skills

Swift and SDK: Swift · Swift Concurrency (async/await, actors) · SwiftUI · UIKit · ARC and memory management

Architecture: The Composable Architecture · MVVM · modular architecture · unidirectional state

Apple frameworks: CloudKit · SwiftData / Core Data · Combine · AVFoundation · PencilKit · VisionKit · WidgetKit · Core Spotlight · SpriteKit · visionOS · accessibility · localisation

Testing and quality: Swift Testing · XCTest · UI and integration testing · code review

Backend and tooling: Server-Side Swift · REST · Swift Package Manager · Git · GitHub Actions · CI/CD

Education

BSc Computer Engineering and Automation — eCampus University · 2026

World Class Developer — Apple Developer Academy, University of Naples Federico II · 2017 – 2018

Certifications

Apple Certified Trainer — App Development with Swift (Apple) · Apple Intelligence On-Demand (Kodeco)
